PROJECTS

Shopkart

A product that intergrates the offline and online shopping experience of the user. This product is solely based on the implementation on QR codes. APIs are developed using NodeJS and ExpressJS. Database used is MongoDB. Android Applicaion is developed using Native Java.

DSC Portal

This is the project developed to manage our Developer Student Clubs community powered by Google Developers. New members can register, and there is a admin section and dashboard as well. This platform is also used for registering for events like workshops, seminars, code-labs, etc.
